

A corner of nature

Blue Waters, whispering winds, a few things of the nature,
Green trees, tiny plants still survive pollution.

Nature has evolved beyond your wildest imagination,
But pollution has caused destruction.

Trees clean out air yet we cut them down,
Birds chirp, dogs bark that brightens our melodious life!

Nature is serving us every moment,
in the future you may understand!

In every corner, a story untold of blue waters and whispering breezy winds, oh so bold.
