

# A Turtle's Tear

Turtles are beautiful, amazing creatures.

They will soon be gone if there are no listeners.

To all the people that are listening please take heed.

Turtles out at sea are in serious need.

1.4 million turtles die each year.

For turtles' extinction is extremely near.

Pollution and trash that **we** dump into the ocean.

That trash and junk will stop turtles in their way of motion.

For it suffocates and kills those amazing reptiles.

But if we clean up those frowns will turn into smiles.

I'm only saying this if you really care.

Please help us save all the turtles out there.
